

The Gift Guide 2025 Lomography

lomography

OFFICIAL PRESS RELEASE

The Lomographic
Society Proudly Presents:

There's something timeless about the holiday season. The soft glow of lights, the cozy smell of sweet treats baking in the oven, the laughter that echoes through generations. At Lomography, we're here to help you capture every moment from cherished family traditions to new adventures with analogue. From cameras and film to creative lenses and accessories, our 2025 gift guide is packed with ideas for standout gifts that will inspire every photographer and help make this holiday season magical and memorable.

Lomography Cameras

A gateway to endless experimentation, Lomography cameras are packed with exciting creative features just waiting to be unwrapped, like surprises beneath the tree.

Lomomatic 110 Camera

Don't be fooled by its size – this tiny creative companion is bursting with big ideas! With a glass lens, automatic exposure, controllable ISO, zone focusing, and two aperture settings, it can squeeze into all types of small spaces for crazy Lomographic perspectives. Crafted for those who crave spontaneity and live for carefree moments, the Lomomatic 110 captures a fragment of every memory with distinctive 110 charm.

Joseph Petzval Focus-Coupled Bokeh Control Art Lenses

An exciting evolution of the legendary Petzval lens, this handcrafted lineup including 35 mm, 55 mm and 80.5 mm lenses for Sony E, Canon RF & Nikon Z mirrorless systems offers full creative control for photography and videography. Each lens provides a unique perspective on the signature Petzval look with dreamy swirly bokeh controllable across seven levels. The lens series boasts unified gear positions, 180° focus throw, and follow-focus compatibility and a focus coupled bokeh control technology eliminating focus shifts. The 27 mm and 135 mm lenses are currently in development and will be available soon.

WHAT THE HELL IS LOMOGRAPHY?

In 1992 a creative revolution burst into life, changing the photographic world forever. Its name? The Lomographic Society International. Established by an unruly bunch of happy-go-lucky students, their simple idea exploded into an eccentric global movement and became the wild child of analogue photography we know today. Lomography is a state of mind – and it's lurking within us all! Whether you're a complete novice or a seasoned pro, we believe that you have the power to create something incredible. To support the creative endeavors of our community, we supply Lomographers all over the world with an ever-expanding range of experimental analogue goodies through our Online Shop and global network of retail partners. As a Lomographer, we invite you to forget the rulebook, treasure life's many surprises and throw caution to the wind to capture life in all its bizarre, bewildering glory. It's been one humbling and wild ride, but there's much more to come.

WHO THE HELL ARE LOMOGRAPHERS?

Lomographers are anyone and everyone with an analogue camera in their hands and a hunger for experimentation. They come in all shapes and sizes, from all four corners of the world to share their passion for film photography with an equally enthusiastic group of like-minded Lomographers. If you're looking for a Lomographer, they're not hard to spot. Not afraid to break the mould, you'll find them up a tree, lying under a park bench, probably acting in a seemingly confusing manner but don't worry – they're just having fun, getting a new perspective and doing whatever the hell they feel like! There are currently over 1 million creative community members committed to the Lomography way of life. They've uploaded over 17 million photos to our Community Site – the largest online archive of analogue and experimental photography in the world and continue to keep us on our toes with their endless analogue adventures!
